Big Defined Contribution Themes for 2023 and Beyond

SECURE Act 2.0 & Financial Wellness

- Emergency savings
- Student loans
- Leakage/Auto-portability

Re-imagined Default Investments

- Positive equity/bond correlations
- Need for diversifiers
- Hybrid Default [TDF + managed accounts or TDF + annuities]

Retirement Income

- One size does not fit all
- Spectrum of solutions [guaranteed/non-guaranteed]
- Recordkeeper integration is key

Personalization

- Value-add from managed accounts
- Personal TDFs
- Data security and privacy issues

ESG & Climate Change

- Politics aside, it's prudent risk management to consider economic effects of these factors on retirement assets

Litigation

- ERISA plaintiff's suits expanding beyond fees to "imprudent investment" claims

Defined Contribution Landscape

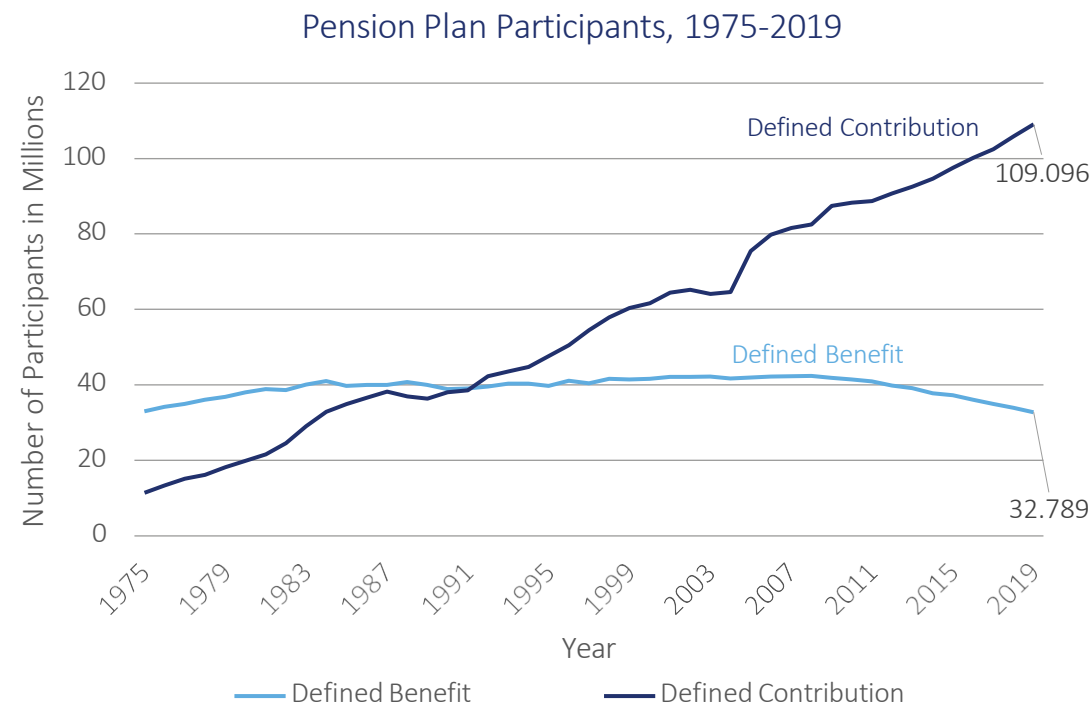

Secular Retirement Trends

- Americans are living longer than ever before.
- At the same, they are now more responsible than ever before for funding their own retirement.
- In a post pension world, we believe the need for professional advice and investment management is more acute than ever before.

Dynamic Path of the Target Date Fund Asset Allocation is the “Glidepath”

The asset allocation automatically shifts from a growth/capital appreciation objective for young savers to a more conservative/income-oriented objective as retirement age approaches. Glidepaths can vary meaningfully and should be appropriate for your demographic.

Target Equity Allocation (%)	2065	2060	2055	2050	2045	2040	2035	2030	2025	2020	2015	2010	2005	Income/ Final

Dynamic Path of the Target Date Fund Asset Allocation is the “Glidepath”

As we develop Target Date Fund glidepaths, it is important to consider the different risks and considerations of individual investors throughout life.

Wilshire is Very Experienced in Glidepath Design and Management

- Wilshire is the architect for close to \$50 billion in glidepath solutions in the Target Date Fund marketplace, designing solutions for defined contribution and college savings plan participants.
- We take your specific participant demographic and desired income replacement ratio goal into account
- Glidepaths are regularly re-optimized using Wilshire's proprietary capital market assumptions to reposition allocations in response to changing market environments and expectations

Participant Investment Behavior

Wilshire's Defined Contribution Approach

Key Tenets of the Defined Contribution Plan

The goal is to provide participants with solutions rather than options

Effective Investment Menu Design

- Adequately diversified yet streamlined menu that is easily understood by the “average” participant
 - Simplified to avoid “choice overload”
 - Informed by participant demographics
- Fulfill three main objective-based buckets: Growth, Inflation Sensitive, and Capital Preservation.
 - Offer a choice of actively- and passively-managed approaches.
- Focus on stylistically pure investment options.
 - Avoid unintended style biases and redundancies.
 - Provide access to high-quality investment strategies via low-cost institutional vehicles.

A well-designed menu can drive better retirement outcomes.

The goal is to provide participants with **solutions** that meet their diverse needs and risk preferences, and to focus participant choice on decisions that are most impactful.

Investment Menu Organization

- Match investment structure complexity with expertise of participants through creation of tiers
- Offer professionally managed asset allocation funds (i.e., Target Date Funds) for those participants who do not wish to create and maintain their own portfolios
- Offer sufficient number of investment options to meet diverse participant needs while avoiding redundancy
- Consider offering index funds across major asset classes
- Preference for custom, multi-manager active funds covering broad asset classes
- Minimize participant costs
- Maximize participant transparency

Manager Research : Qualitative + Quantitative Process

Our manager research process is heavily qualitative – drives search candidates

- Focus on six key areas; conduct more than 1,600 manager meetings a year on average
- Analysts have dedicated asset class coverage, with some compensation tied to research/forecasts

Quantitative analysis seeks to uncover portfolio characteristics

- Conduct returns-based, holdings-based and multi-factor risk analyses using sophisticated proprietary analytic tools
- Seek to uncover the key drivers of performance
- Attempt to determine what risks a portfolio presents

Research team delves beyond the numbers

- Understand investment philosophy
- Evaluate manager and organization

Develop expectations of future performance

- Derive explicit performance and risk forecasts for managers

Traditional Manager Evaluations

Qualitative Due Diligence

Organization

Evaluating the investment team resources and background, including how the overall organizational structure promotes stability and focus

Information

Understanding a manager’s edge in gathering and processing information

Forecasting

Evaluating how a manager creates forecasts, the accuracy, and how they compare to peers in terms of distinctiveness.

Portfolio Construction

Rating how a manager properly aligns assumed risks with their forecasting ability/skill

Implementation

Strong focus on operational effectiveness: measuring a manager’s trading capabilities and back-office efficiency

Attribution

Assessing a firm’s willingness and ability to constantly reevaluate their own investment process/performance and incorporate feedback to improve their decision-making ability
